Bed Bug Dogs

Bed Bug Dogs

Our NEDSCA trained bed bug dog will accurately detect the bed bug infestation. First Response Bedbug Dogs provides canine detection services to investigate your premises for bed bugs. Our trained canines search for bed bugs with their noses which is faster and more accurate than any visual search done by a person. Dogs are naturally inclined to stick their noses into every crack and crevice and our dogs have been encouraged to follow this instinct so that no nook or cranny goes unchecked.

First Response Bedbug Dogs

First Response Bedbug Dogs: We would like to thank you for your thorough inspection of our dermatology office. We get many patients who come in with bedbug symptoms and the entire staff here is always nervous about the chance of us having a problem of our own. We would love to have you back again.

To Whom This May Concern: I would like to thank you for pointing out the fact that we did NOT have bedbugs. I have never heard of carpet beetles, but that's exactly what it ended up being.

First Response Bedbug Dogs: Your dog is absolutely amazing and such a hard working dog. We cant thank you enough for bringing him to our summer rental house. It was great to see a negative reading. We still actually never found out what was causing the problem but we were glad that bedbugs were ruled out.
